Database Foundations

ASSIGNMENT 2
Due Date: Oct 15, 2017 (11:59 pm)

Please create a relational schema for the **ER diagram that is attached to this assignment as the Assignment 1 solution (File name: Solution_Assignment1.jpeg). Please use GRAPHICAL REPRESENTATION to express your relational schema.**

> a. Show all the tables (relations) you need to create with all the corresponding attributes for each table, including *foreign keys*.

> b. Show the primary keys (underline), foreign keys (dotted underline) and foreign key references (using arrows).

Use the solution attached to this assignment, not your own Assignment 1 Solution. No exceptions!

Submit a **soft copy** of your assignment (one submission per group) by the due date (refer to the class syllabus for late submission penalties). You can make only ONE attempt. Therefore, do NOT submit your assignment prematurely if you think that you can make changes on your solution later.

Good luck.
